## WEBAPP DEVELOPMENT

Problem statement:

Develop a React Web App to perform the below tasks:

➤ Call this API **https://reqres.in/api/users?page=2** to get the dataset.
➤ Create a List view with separate lists for each item, similar to the illustration below. use the above dataset to populate the list view, using the fields for id, avatar, and first_name.

Create a textbox above the ListView to search the employee by first_name.

Expected Output:

➤ Complied Source code uploaded in GitHub (Share the link)

Evaluation Criteria:

➤ Working code that's running in browser
➤ UI design
➤ Coding Standards
